
exceet company AEMtec and Dutch optics specialist Anteryon agree on collaboration

- Single source for innovative, end2end opto-electronics solutions
- Competitive benefits thanks to shorter time-to-market and optimized quality
- Client-specific opto-electronics solutions and industrial series manufacturing
“Made in Europe”

Rotkreuz, Berlin, Eindhoven, Sept. 05, 2016 – AEMtec GmbH, a member company of the international technology group exceet, and the Dutch Anteryon BV, a spin-off of Philips Electronics, have agreed to collaborate in the field of opto-electronics solutions. Based on the collaboration agreement, the two experienced opto-electronics providers plan to offer innovative, end-to-end, high-quality solutions free of interface losses. In addition to marketing efforts, the two partners will focus on developing cutting-edge technologies and solutions.

AEMtec, based in Berlin, will contribute extensive knowhow and flexible production capabilities for high-quality miniaturized technologies and sophisticated opto-electronics solutions. The exceet member company maintains state-of-the-art manufacturing facilities and serves many reputable international customers. Anteryon, like AEMtec, is a leading provider of innovative optical solutions. The company develops and produces these primarily for the industrial market.

In their joint customer projects, the partners will rely on the tried and proven products and services of both enterprises and collaborate closely to design and develop new technologies and solutions. Clients of AEMtec and Anteryon therefore profit by gaining a single source of comprehensive opto-electronics solutions based on mature as well as innovative components, supported by wide-ranging technology knowhow. The prominent market position of these two well-established providers offers clients benefits such as shorter time-to-market cycles and optimized quality, thanks to intensive collaboration between the partners, reduced coordination hindrances and maximum competence in the development of innovative, market-ready opto-electronic solutions.

“Thanks to our collaboration with Anteryon, we look forward to offering our customers, the customers of Anteryon and the market generally a range of innovative opto-electronic solutions while guaranteeing maximum quality and short development times”, says Jan Trommershausen, managing director of AEMtec. “This offers our customers the chance to realize unique competitive benefits and gives us the opportunity to explore new market potentials”, adds Gert-Jan Bloks, CEO of Anteryon.

About exceet Group

exceet is an international technology group specializing in intelligent electronics, complex and reliable electronics.

About AEMtec GmbH

AEMtec, with headquarters and manufacturing facilities at the reputable science and technology park Berlin-Adlershof, offers state-of-the-art technologies for complex client-specific (opto-) electronic applications. The company handles a wide spectrum of high-end chip level technologies including wafer back-end processes, chip on board, flip chip, 3D integration and opto-packaging. AEMtec's portfolio also extends to wide-ranging development services, e.g. feasibility studies for mounting and bonding technology, design and layout, production of test equipment, and support through to serial production.

About Anteryon BV

Anteryon, with headquarters and manufacturing facilities in the well known high tech environment Eindhoven, is a design and manufacturing company that provides innovative optical solutions from idea to mass production for industrial markets. Anteryon designs, manufactures and test optical solutions from component level up to complex sub assemblies, with core competences in replication of optical structures, structuring glass and ceramics and opto mechatronic assemblies. Anteryon spun off from Philips in 2006 and is part of the Anteryon International holding.
