

exceet Secure Solutions and Swisscom M2M to offer end-to-end M2M/IoT Healthcare Solutions

***Düsseldorf, June 30, 2015* – exceet Secure Solutions AG, a member company of exceet Group, and Swisscom M2M will be combining their competencies for a comprehensive M2M solution portfolio in the healthcare field.**

For customers, the benefits of this collaboration are threefold: They can obtain all the services they need to realize their M2M projects from a single source, rely on the long-standing experience of two internationally active enterprises, and select the products they need from the broad portfolios of both partners.

exceet Secure Solutions and the Swisscom M2M Center of Competence will assume, jointly or individually as the customer desires, responsibility for cross-board conceptualization and implementation of M2M projects. Together, the partners cover all M2M-relevant disciplines, including benefit analysis, selection and integration of suitable M2M devices, connectivity aspects, M2M platform linkage and client-specific compliance and IT security requirements.

Swisscom's prime contributions to this collaborative effort are extensive practical knowhow as well as proprietary software and services for data processing, analysis and visualization. Customers can also use Swisscom's own M2M platform, along with its connectivity features and add-on applications, to drive their individual projects. Thanks to its broad customer base, Swisscom also covers global connectivity requirements and offers high-security cloud data storage based in Switzerland.

exceet Secure Solutions provides support in digitalizing business processes and developing M2M and e-health solutions for intelligent, secure connectivity. The exceet Secure Solutions portfolio extends to individual benefit analyses, innovation consulting, supply and production of standardized or custom M2M devices, development of IT security concepts and application integration.

“Our collaboration with exceet Secure Solutions lets us leverage our extensive IT security knowhow to promote sophisticated M2M projects. That in turn allows us to satisfy growing requirements in terms of compliance, data protection and data security, particularly in the healthcare segment”, says Jaap Vossen, Head of M2M Sales & Marketing at Swisscom. “Particularly in M2M projects that involve the gathering and processing of sensitive personal data, it's imperative for project success that IT security aspects are considered right from the conceptualization phase.”

Just recently, exceet Secure Solutions successfully concluded the development of the public key infrastructure for the core telematics foundation of Germany's new electronic health card (eGK), assuming a key role in connecting all the players of the future healthcare system. For collaboration partners, exceet's eminent knowhow in the field of data protection and security

not only simplifies machine connectivity, it also enables end-to-end implementation of high-volume M2M solutions and complex, secure M2M ecosystems.

Björn Peters, Head of the M2M/IoT Segment at exceet Secure Solutions AG, adds: “We are very pleased that we are able to expand our healthcare portfolio with the aid of Swisscom. In Swisscom, we have an experienced partner at our side to help us take on complex, global M2M projects professionally, rapidly and in accordance with international compliance and IT security requirements.”

exceet Secure Solutions has been awarded the Quality Seal “IT Security Made in Germany 2015”

About exceet Secure Solutions

exceet Secure Solutions specializes in connectivity solutions and offers consulting, hardware, software and services in this field. We focus on M2M solutions and IT security, with special expertise in the fields of e-health and industry. Our portfolio is supplemented by HSMs, PKI solutions as well as products and services for qualified signatures and time stamps, including Trust Center operation.
