

## **Bureau Veritas again recognized as a top employer in both France and the UK**

17/02/16

For the second consecutive year, Bureau Veritas figures in **2016 Best Employers of France** ranking published in February 2016 by French magazine "Capital". And, Bureau Veritas is again ranked in **2nd position in the "Engineering" category**.

This independent and anonymous study (survey conducted by Statista institute, none of the companies were informed prior to the study) was performed by contacting some 20,000 employees from 2,100 companies of all sectors of activity in France with a workforce of more than 500. Only the list of top 40 companies amongst the 500 best companies has been published.

For the 4th year in a row, Bureau Veritas in the UK received the **"Top Employer"** certificate from the Top Employers Institute, an independent organization created in 1991 aiming at rewarding companies that provide excellent employee conditions.

The certification was delivered following a wide survey and then a close audit, notably in terms of talent development, workforce planning, on-boarding or career development. The results were unveiled on February 11, 2016.

These two recognitions are the result of optimization efforts led by the Group, notably in Europe and more particularly in France and the UK, in terms of recruitment and development of employees to better serve its clients' needs worldwide.
