

## **exceet company AEMtec receives CIR accreditation from French ministry of research**

- Clear customer benefit from the promotion of pioneering projects
- France recognizes the sustainable innovation strength of AEMtec

**Rotkreuz, Berlin, 21 April 2016 – AEMtec GmbH, a company in international technology group exceet, has been recognized by the French ministry of research as a company that works scientifically and has received the associated CIR (Crédit d’Impôt Recherche) accreditation.**

Customers of AEMtec in France benefit primarily financially from the state CIR registration of AEMtec. They can apply for substantial tax concessions for development projects if they work with AEMtec. The CIR accreditation is reviewed regularly in order to guarantee a continuously high standard in research and development.

AEMtec, which is based in Berlin, has been one of the leading suppliers of innovative micro and optoelectronic components for medical technology, industry, data and telecommunications, and the automotive sector for a number of years. In the health sector particularly, the company has outstanding production capabilities and its customers include well-known international medical technology manufacturers. As such, AEMtec currently has significant involvement in the development of a new medical device. The records and documentation produced within the context of the project represent the basis for the CIR registration of AEMtec.

“We are delighted that, with the CIR registration, we can offer our customers in France immediate financially appreciable competitive advantages in the development of innovative technologies,” says Dan Negrea, Managing Director at AEMtec. “In addition to know-how and quality, we can therefore offer existing and new customers a further key feature distinguishing us from the competition.”
