

## **exceet at the SPS IPC Drives – A Single Source for Control, Input and Communications Technologies**

- New compact and customizable control units
- Modern and user-friendly operating and display systems
- Devices for secure communication, remote control and access to cloud services

**Rotkreuz, Nov. 10, 2015 – exceet electronics, a member company of exceet Group and a specialist for complex electronic control systems and components, will participate in this year’s SPS IPC Drives expo to demonstrate how control, operation and secure connectivity can be optimally integrated into electronic machine and device operations. This enables efficient, cost-optimized manufacturing processes and user-friendly products. For all its components, exceet electronics maintains a continual focus on maximum quality and long-term availability, offering its customers outstanding investment security.**

Highlights include the i.MX6 and E3800 control families for Linux/Windows and CODESYS recently launched by exceet electronics. Though highly compact, they offer a wide functional range.

### **Standard and Custom Devices**

In device field, exceet is able to provide a wide selection of standard products, but also has extensive competency and proprietary production facilities for developing custom devices. This lets customers select the solution that’s right for them, no matter whether they plan to securely connect a handful of devices or several thousand.

LUCOM, another exceet company, will be at the SPS IPC Drives to showcase a newly developed mobile communications router featuring modem emulation. This device enables an efficient and low-cost switch to IP-based technology without interrupting production. LUCOM will also be exhibiting the industrial router LobiX WRT, a proprietary development that relies on the open-source operating system openWrt and is thus highly useful in industrial applications.

The exceet companies at the SPS IPC Drives are exceet electronics and LUCOM. Please visit us in Hall 7 at Booth 690.

### **About exceet Group**

exceet is an international technology group specializing in intelligent electronics, complex and reliable electronics.

**About exceet electronics**

exceet electronics is a full-service provider for development and production of complex electronic modules, components and systems for the industrial and medical technology field.

**About LUCOM**

LUCOM GmbH, a member company of exceet Group, develops and markets products and services associated with mobile communications and remote services. The M2M specialist's industrial VPN routers offer virtually limitless connectivity potential for industrial facilities. LUCOM's portfolio also includes the cloud-based management solution Digicluster.

In the field of automation and security technology, LUCOM also provides support in data measurement, data analysis and data transmission via configurable sensors. The company's portfolio is rounded off by products and services for light-grid computer surveillance.

In collaboration with international partners, LUCOM offers comprehensive services around the globe.
